Safety Caution

Notice!

- This cup warmer is an electrical product, and safety matters must be strictly observed to avoid accidents.
- In this manual, the important matters to prevent accidents and the use of the product are pointed out. Please read this manual carefully before using this product safely.
- After reading, please keep it safe for future reference.

Notice!

- Do not put the cup warmer on the carpet or other similar surfaces directly.
- After the cup warmer is turned on and heating, do not keep the bare skin in contact with the storage layer for a long time to prevent skin burns.
- When the product is in use, do not cover the product with clothing, noodles, bedding, paper, etc.
- Do not place the cup warmer in a humid environment, such as a laundry room, bathroom, etc.
- Do not knock the glass on both sides of the cup warmer to avoid the risk of imitation of limbs or electric shock due to glass fragmentation.
- Must use a well-grounded and fused socket
- When cleaning the cup warmer, please use water and neutral cleaning to clean the outer surface of the product. After cleaning, wipe it with a dry wipe to remove the remaining water on the surface.
- The product adopts a transparent and visual design, which is simple and fashionable. The two sides adopt reinforced tempered glass to improve the resistance of the product.
- After cleaning, allow enough time for the wiped parts to dry, especially to ensure that the power cord plug is completely dry before inserting the power cord into the socket.
- If this product has an unrecoverable failure, do not use it.

Packing List

- Cup Warmer 1pcs
- Power Plug 1pcs
- User Manual 1pcs

Product Overview

1. Technical Parameter

Product Name:	Warm Cup Holder			
Item No.:	W2		W1	
Net Weight:	9.4KG		10.2KG	
Gross Weight:	11.0KG		11.9KG	
Power:	95W		95W	
Nominal Voltage:	(EU)220-240V~	(US)120V~	(EU)220-240V~	(US)120V~
Packing Size:	464*390*473mm		464*390*536mm	

2. Product Features

- The storage layer is made of food-grade 304 (18-8) stainless steel, and all parts are made of environmentally friendly materials. The products are non-toxic and harmless and meet environmental protection standards.
- The product adopts a transparent and visual design, which is simple and fashionable. The two sides adopt reinforced tempered glass to improve the resistance of the product.
- The heating layer adopts low-voltage electric heating film heating, DC24V isolated power supply, long service life, safety and reliability.
- Ten color atmosphere lights are suitable for different places. Users can choose the suitable color atmosphere according to their own preferences.

- With automatic constant temperature function, dry environment, temperature control range: $56^{\circ}\text{C} \pm 7^{\circ}\text{C}$, this temperature can inactivate 99% of bacteria and effectively inhibit the growth of bacteria.
- This product has a wide range of applications and can be used for drying and disinfecting cups, plates, knives, forks, bowls, chopsticks, etc.

Maintenance and Repair

1. The product power cannot be turned on normally.

Check whether the power input socket and power plug are loose, and determine whether the product is powered on.

Check whether the main power switch on the back of the product is on.

2. The product cannot be heated.

Check whether the heating switch is turned on.

The cup warmer is heated by low voltage, and the temperature rises steadily. It takes 10-15 minutes for the temperature to reach a constant value. After turning on the machine, it takes a few minutes to sense the temperature rise.
